Be Free from Evil and Devil

We need try to remain free from the devil and evil by remaining distant from those types of people. We need to remain free from the devil and evil during this pandemic. Covid-19 cases are on the rise in this nation because satan is trying to interfere in our lives and stop us from spending time with our families this year for thanksgiving and christian. We must have faith and fight this virus. We must give God back control of his kingdom by being faithful, ending violence, lust, hate, division, dysfunction, killing, stealing, provide false witness and bear false witness about people.

Devil trying to provide hurt while God trying to help some faithful people prosper.

People need to honor their marriages without separation and divorce. If you are having problems and concerns in your marriage, you need to work it out with communication and compromise. If you want to leave your spouse and have problems on where to go, God is trying to tell you something that you need to stay with your spouse and work it out with each other. Marriages last long longer after age 25 because marriages are drama free with no problems later in life after 25 years of marriage. That is a true fact.

This week will be my last sermon on Build your Tabernacle series. Today, I will sign a new executive order to allow Christian Education Ministry to be a virtue during the rise of cases during Covid-19 pandemic.

I like the pandemic to be over and past us because I like to keep myself motivated and committed to volunteering at homeless shelters in Chicago and southwest Michigan. I do not like large gaps on my resume under volunteer experience. I have a four-page resume with higher education and education background, professional experience, projects, volunteer experience, summary of qualifications, association memberships. I have ten years of chief executive experience in nonprofit sector which includes my experience as senior pastor. I have seven years of volunteer experience. I will have two years volunteer experience gap to make up after the Covid-19 pandemic. I have six years and five months of political and public policy experience on housing and urban development, economic issues, poverty, race relations, religious freedom, mental health, youth development, healthcare-prescription drug accessibility and affordability, gun control and gun violence, trade policy policy with Africa to end poverty, depression and homelessness; sexual assault and rape and education in Illinois, New York, Maryland, Pennsylvania, Georgia, Iowa, Kentucky and Ohio. I am strong advocate for the homelessness to make sure it is economic opportunity and fairness to end poverty and homelessness permanently and long-term.
