Taking Evil Out of Our Society

We need to take evil out of our nation and society by having your voices heard in this election year to vote against the evil person in the white house. We need to get evil out of the oval office to restore morality in this nation again. Donald Trump says he is not a racist, but his hateful comments and not denouncing racial violence says a different story. We need to restore morality in this nation, so African American and Latinos will no longer feel they are under attack from this administration with police brutality and white supremacy. Donald Trump is using white supremacy and nationalism as his body count. It means Donald Trump Is not moral in his heart and soul for minorities and women in this nation.

Donald Trump is the devil based on the following:

- Violence and killing by allowing and encourage people to kill and looting in this nation
- No respect for deceased politicians and diplomats
- No respect for families of former Presidents and politicians
- No respect for working families with tax breaks for the rich

Real Christians and disciples help the little people in this nation by caring for the poor and homelessness. Christians and disciples care about all families including latinos and illegal immigrants by not keeping them locked in cages at detention centers near the border. Christians and disciples do not provide false reports on people and make up lies to try to damage people reputation, such as Donald Trump negative attack Biden son Hunter on Ukraine and China. Christians and disciples respect and love for other people families that are still alive or deceased on earth. Christians and disciples have love and respect for the sick and deceased.

Staff agreed to suspend church operations for November 2020 based on Covid-19 surge. All landlords in this nation need be out of business and invest more tax money in affordable housing because landlords who manage shared room rental are slumlords. Shared room rental housing do not provide necessary repairs and renovations to make tenants feel comfortable, housing is poor with bad interior exterior, bad living environment for shared room rental housing, violation of fire code with no safety and procedures put in place to prevent and reduce fire-no smoke detectors, no safety for tenants, lack of honesty from landlord for shared room rental housing, tenants are being scammed by landlords that are slumlords of shared room rental housing, no transparency from landlords of shared room rental housing. Homelessness Review Board members know my advocacy for more affordable housing for ten years and ending shared room rental housing in this nation including the Detroit area. people deserve permanent housing to live on their own in houses and apartments in this nation. This is how I voted at the polls during this election: 46% Republican, 43% Democratic and 11% another candidate and/or third party. Homelessness Ministry members and volunteers provided more food and supplies to the homeless in Illinois.

We are divided as a nation, which is a sad thing for our political system and politicians. I am not strong supporter of Nancy Pelosi and she needs to change how Democrats do business in House

of Representatives. I support trade deal with Africa because more people have come out to support my congregation more than any church in the United States of America. My trade deal proposal was rejected by the Obama administration to open up markets and jobs in Africa to get more people out of poverty, such as residents that live in poor communities in Nigeria, Ghana, South Africa, Uganda, Kenya and Liberia. I am socially conservative on economics because I try to be more detail oriented on poverty and homelessness in Minority communities, ending homelessness and shared room rental housing with affordable housing, benefits for Americans paying less taxes and keeping more money in households, small business and entrepreneurship, racism in our country and workplace. I was favorable to Biden-Harris, but at a slim margin heading to election day. I talk about the need for faith in households across America to pray and be obedient to God. My momentum had increased some for Trump after the last debate. After I was elected on student government as an undergraduate student, I was a person that cared about students access to affordable education, such as students getting back 50% refund with or without financial aid book vouchers, reduce tuition for students by 11% over ten years while protecting current student services for all students. That's why my vice president running mate teamed up with me because I care about the student body by passing legislation to get things done. Campus The bookstore provided 50% refunds at the end of semester. In Chicago, I like talking to homeless men and women about their economic hardships and living in poverty. That's why I am highly respected by homeless men and women that donated over \$10,000 of my own personal money to help homeless men and women, homeless single parents and children worry about where they the next meal will come from and sleep each night. Some homeless people in Chicago told me about having college degrees and have trouble with pursuing jobs matching their experience and background. I have liked to talk and listen to homeless men and women in Chicago since 2011.
