The Forensic Audit-Defining the Rubble

- Static is what happens when static replaces acoustic clarity.
- Generational rubble is the accumulation of failed systems, liar landlords and fare evading ancestors. It is a habit living in a city that ball does not drop and lights do not stay on.
- You cannot build a high-rise on top of someone else trash.

The Southern Excavation

- In the south in the bible belt, the soul is ready for the church. We are clearing the generational rubble of poverty and static by bringing in independent sovereignty.
- Using affordable vendors for church events and community gatherings to build a foundation that our children will not have to clear later. The church is moving the \$4 million 2026 operating budget to the south to invest in communities in the south.
- As Bishop living in the south in the past, I never had to worry about generational rubble because I was able to spend more money and have more money on hand. It is too much administrative rubble in the north.

The Suit and Street Standard

- The gift of presence is the tool that clears the rubble.
- You cannot clear the rubble from a desk. You have to put on a suit, get in the street, and show the community what a masterpiece looks like.
- Our Tiktok addresses in Houston in 2023 are daily site reports for a new generation.
- The rubble of the past cannot ride the train of the future. Board the artery now.

The Final Inspection

- Being found faithful in a new generation.
- The church legacy will not be rubble. It will be a global hub. In 2026, members will be recognized as the generation has stopped burying their talent and start ruling the many.
